

OSCAR ORDÓÑEZ

Data Governance Engineer · Data Scientist · AI Engineer

Bogotá, Colombia • +57 322 759 6832 • 13odob27@gmail.com

LinkedIn • GitHub • Portfolio • OdobGames

PROFESSIONAL PROFILE

Computer Scientist from Universidad Nacional de Colombia, specialised in Data Governance, cloud data engineering (Databricks, AWS) and applied Artificial Intelligence, with experience in the Telco (Claro Colombia) and FinTech (BBVA) sectors. Focused on governing the data lifecycle and auditing the use of information assets across large-scale ecosystems, aligned with the DAMA-DMBOK2, DCAM v2.2 and ISO 25012 frameworks. Proficient in Python, SQL and PySpark, on Databricks platforms (Unity Catalog, Delta Lake) and Teradata, and in integrating LLMs to automate data processes. Advanced English (C1) and experience working under agile methodologies (Scrum).

PROFESSIONAL EXPERIENCE

Data Governance Engineer

April 2026 – Present

Grupo CINTÉ — on assignment at Claro Colombia · Bogotá

- **Data lifecycle governance:** Implementation of Data Governance practices across a multi-platform Data Warehouse ecosystem, ensuring the traceability, quality and standardisation of information assets throughout their lifecycle.
- **Asset usage auditing:** Design and development of analytical solutions in Python to audit the use of the data inventory and identify redundant objects, feeding the corporate clean-up and optimisation policies.
- **AI-assisted cataloguing:** Application of LLMs and statistical sampling techniques to automate the cataloguing, classification and semantic enrichment of metadata at scale.
- **Governance policies and standards:** Definition of usage, access and incident policies for analytical environments on Databricks (Unity Catalog), aligned with DAMA-DMBOK2, DCAM v2.2 and ISO 25012, under the Scrum methodology.

Artificial Intelligence Developer (Contractor)

January 2026 – February 2026

Softgic · Colombia

- **AI agent development:** Construction of an end-to-end Artificial Intelligence agent, integrating LLMs with automation flows to solve business use cases.
- **n8n workflows:** Design, coding and orchestration of complex workflows in n8n, integrating APIs, data sources and AI services to automate critical processes.
- **SQL and data modelling:** Intensive SQL development for the extraction, transformation and analysis of data supporting the agent's behaviour.
- **Agile methodologies:** Iterative delivery under Scrum frameworks, with short validation and deployment cycles.

Data Analyst Specialist · Business Intelligence — Client Solutions

March 2025 – January 2026

BBVA Colombia · Bogotá

- **Profitability (P&L) model architecture:** Design and implementation of the acquiring unit's profitability model on the AWS ecosystem (SageMaker, Athena, S3), processing large volumes of transactional data.
- **ETL/ELT pipelines:** Development of automated data pipelines with PySpark and advanced SQL to optimise the ingestion, transformation and availability of information for the business areas.
- **Business Intelligence and visualisation:** Design of strategic dashboards in MicroStrategy and Google Sheets (Apps Script) to track the key KPIs of the acquiring business.
- **Predictive modelling:** Construction of predictive models with Python (Pandas, Scikit-learn) to support financial and commercial decision-making.
- **Generative AI:** Research into and integration of LLMs and Generative AI APIs to support advanced analysis and the automated generation of executive reports.

Intern • Profitability — Client Solutions

September 2024 – February 2025

BBVA Colombia • Bogotá

- **Automation of operational processes:** Development of automation routines for the recurring operational tasks of the Profitability area, replacing procedures that until then were carried out manually.
- **Retail banking operations support:** Support for the day-to-day running of the retail banking business within the Client Solutions unit.

Software, AI & Game Developer (Indie)

January 2023 – Present

OdobGames • Personal project

- **Data-driven development:** Application of AI and analytics to improve digital products and optimise the user experience.
- **Full-Stack Mobile & Game Development:** Mobile development with Unity (C#) and prototyping in Unreal Engine (UEFN), managing the full lifecycle: programming, build and store publication.
- **Automation & APIs:** Implementation of n8n flows and API integration to optimise the studio's internal processes.

EDUCATION

B.S. Computer Science

2019 – 2025

Universidad Nacional de Colombia • Bogotá, Colombia

TECHNICAL SKILLS

Data Governance: Data Governance, Data Catalog, Data Quality, Metadata Management, Data Lineage, Master Data Management, DAMA-DMBOK2, DCAM v2.2, ISO 25012.

Cloud & Big Data: Databricks (Unity Catalog, Delta Lake, Spark), AWS (SageMaker, Athena, S3), Teradata, PySpark, Apache Spark, Data Warehouse.

Data Science & AI: Python (Pandas, NumPy, Scikit-learn), Predictive Modelling, Machine Learning, LLMs, GenAI, Prompt Engineering, AI API Integration.

Databases & ETL: Advanced SQL, Data Modelling, ETL/ELT, Query Optimisation, Data Profiling, Distributed Processing.

Business Intelligence: MicroStrategy, Google Sheets (Apps Script), Data Visualisation, KPIs, Executive Dashboards.

Automation & AI Agents: n8n, Workflow Orchestration, AI Agents, API Integration.

Software Development: Python, C# (Unity), Unreal Engine (UEFN), Git, GitHub, Azure DevOps.

Methodologies: Scrum, Agile, Collaborative Work in Multidisciplinary Teams.

Languages: Spanish (Native) | English Advanced (C1).
